

Vertical A & B Cost Report

Vertical A's main costs are Cost of Goods Sold and Financial Reporting Outsourcing Cost. Cost of Goods Sold reflects the direct costs attributable to the production of goods sold, while Financial Reporting Outsourcing Cost covers third-party services for accounting and compliance. Other costs include Stocking, Tax, Operating, and miscellaneous items. The cost structure is typical for a sales-driven operation, with irregular but significant expenses in certain months.

Vertical A Cost Summary

Category	Total (VND)
Stocking Cost	23,172,500
Tax	2,356,250
Operating Cost	1,310,000
Outsourcing Cost	5,850,000
Other Cost	3,000,000
Total Cost	35,688,750

Vertical B represents the upfront cost prediction for research, development, and intellectual property creation. Major cost categories include legal registration, patent applications, professional legal documentation, R&D salaries, prototyping, technical documentation, certification, and business development. The cost structure is front-loaded with legal and R&D expenses, followed by periodic certification and business development costs. This reflects a growth and innovation-driven approach, with significant investment in technology and compliance to support future scaling.
